RE: Involvement of Puget Sound Teacher PEAB Members in Reviewing and
Revising Programs to Meet Standard V Requirement
FROM: Lila Transue, University of Puget Sound Teacher PEAB Member
DATE: June 3, 2009

As a member of the Teacher PEAB who has participated in reviewing program developments, revisions, and documents to meet the Standard V requirement, I affirm that during the academic years, 2007-2008 and 2008-2009 we participated in discussions and mini-workshops on the over-all dimensions of Standard V and on specific elements. Among the considerations for feedback to faculty were: issues of parent communication, community connection, cultural competence, uses of technology, and new relationship between field and campus involving teacher-based and student-based evidence. We also reviewed at the meeting this day, the Standard V Program Re-approval report.
